

This week's issue

Role of GALVmed in helping to protect livestock and improve human lives, p 611

Use of Holter electrocardiography to study heart rate variability in dogs, p 622

Impact of footbath width on level of faecal contamination by cattle, p 628

606 Comment

606 New structure for specialisation

607 News and Reports

- 607 RCVS appoints its first chief executive
- 607 Call for new protocols to govern the movement of elite sport horses
- 608 Dairy cow welfare initiative launched
- 608 New qualification for pet behaviourists
- 609 Extolling the benefits of microchipping
- 609 Innovative vaccine formulation to help protect village chickens
- 610 Changing attitudes to veterinary preventive medicine
- 610 Hernia repair brings benefits all round

611 Feature

611 Protecting livestock, improving human lives (K. Sones)

614 Surveillance

614 International disease monitoring, January to March 2012

617 News in Brief

618 Research

- 618 A fresh look at vesicovaginal reflux in mares (P. J. Pollock)
- 620 Risk of bovine tuberculosis for cattle sold out from herds during 2005 in Ireland (A. M. Berrian and others)
- 621 Evaluation of a modification of the McKinnon technique to correct urine pooling in mares (T. M. Prado and others)

622 Heart rate variability parameters of myxomatous mitral valve disease in dogs with and without heart failure obtained using 24-hour Holter electrocardiography (M. S. Oliveira and others)

623 Detection of *Mycoplasma hyopneumoniae* in nasal swabs sampled from pig farmers (H. Nathues and others)

623 Identification of *Tenacibaculum maritimum* strains from marine farmed fish in Greece (M. N. Kolygas and others)

624 Research Digest

625 Books

626 Viewpoint

626 To recommend or not to recommend? (B. Faulkner)

627 Gazette

628 Letters

- 628 Effect of footbath width on faecal contamination by cattle (R. Blowey, N. Chesterton)
- 628 Importance of surgical swab counts (M. Whitehead)
- 630 Adding value for farmers through herd health plans (C. Hudson, M. Green)
- 630 Sudden deaths in greyhounds due to canine haemorrhagic pneumonia (S. Gower, R. Payne)
- 630 Role of liver fluke infection in hindering the detection of bovine TB (T. O. Jones)
